Capturem™ Protein A Miniprep Columns

Catalog No. 635717
Amount 12 columns
Lot Number Specified on product label.

Description
Capturem Protein A Miniprep Columns are single-use disposable columns for simple, rapid purification of antibodies that yield up to 300 µg of purified antibody per column, depending upon species and antibody isotype. This miniprep column is suitable for purification of antibodies from animal sera, ascites fluid, cell culture media and other sources.

Package Contents
- 12 Capturem Protein A Miniprep Columns

Storage Conditions
- Store at room temperature.

Shelf Life
- 1 year from date of receipt under proper storage conditions.

Shipping Conditions
- Room temperature

Quality Control Data
The Capturem Protein A Miniprep Columns were tested using horse serum and the buffers described in the Capturem Protein A Miniprep Columns Protocol-At-A-Glance. A serum sample was diluted 1:15 with Equilibration/Binding/Wash Buffer (a phosphate-based buffer containing sodium chloride at pH 8.0). The column was then equilibrated with 800 µl of Equilibration/Binding/Wash Buffer, centrifuged at 1,000 x g for 1 min, and loaded with 800 µl of pre-diluted serum. After centrifugation at 1,000 x g for 1 min, the column was washed with 800 µl of Equilibration/Binding/Wash Buffer and centrifuged. Bound antibody was then eluted with 300 µl Elution Buffer into a tube each containing 30 µl of Neutralization Buffer. The eluate was analyzed by electrophoresis on a 4–20% SDS polyacrylamide gel to verify the purity of the eluted immunoglobulins. The expected ~25 kDa band (corresponding to light chain IgG) and ~50 kDa band (corresponding to heavy chain IgG) were observed.

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department.
