Description
High-purity, double-stranded cDNA for rapid cloning, sequencing, or probe generation. cDNA was synthesized using an oligo(dT) primer and purified to remove interfering RNA. The cDNA was generated from Premium RNA prepared from >30 different human tissues (see page 2).

Package Contents
- 2 vials of cDNA, each containing approximately 20 ng. Each vial is sufficient for 10 or more PCR reactions.

Storage Buffer
- TE buffer

Storage Conditions
- Store at –70°C.
- Working portions may be stored at –20°C for up to 2 weeks in a constant temperature (not “frost-free”) freezer.
- Avoid multiple freeze/thaw cycles.

Concentration
- 2 ng/µl

Number of Tissues
- 35

Shelf Life
- 1 year from date of receipt under proper storage conditions.

Shipping Conditions
- Dry ice (–70°C)

Product Documents
Documents for our products are available for download at takarabio.com/manuals
The following documents apply to this product:
- QUICK-Clone cDNA User Manual (PT1150-1)

Quality Control Data
The cDNA is tested for successful amplification of an 838 bp human β-actin cDNA fragment in 35 cycles or less using 0.5 ng of cDNA.

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department.
Certificate of Analysis

Human Universal QUICK-Clone II

Tissue Sources

Tissue condition: All tissues were normal (i.e., non-diseased) unless otherwise stated.

Cause of death: Sudden death/trauma unless otherwise stated.

Tissue

Human Adrenal Gland - pooled from 67 male/female Caucasians, ages: 17-72; cause of death: trauma
Human Aorta - pooled from 19 male/female Caucasians, ages: 21-75; cause of death: trauma
Human Bone Marrow - pooled from 22 male/female Caucasians, ages: 25-60; cause of death: sudden death or Trauma
Human Brain, cerebellum - pooled from 24 male/female Caucasians, ages: 16-70; cause of death: sudden death
Human Brain, hippocampus - pooled from 25 male/female Caucasians, ages: 16-70; cause of death: sudden death
Human Brain Whole - pooled from 8 male/female Caucasians, ages: 43-65; cause of death: sudden death
Human Fat Cell - pooled from 11 male/female Caucasians, ages: 19-57; cause of death: sudden death
Human Fetal Brain - pooled from 59 male/female Caucasians, ages: 20-33 weeks; cause of death: spontaneous abortion
Human Fetal Heart - pooled from 14 male/female Caucasians, ages: 20-25 weeks; cause of death: spontaneous abortion
Human Fetal Kidney - pooled from 59 male/female Caucasians, ages: 20-33 weeks; cause of death: spontaneous abortion
Human Fetal Liver - pooled from 38 male/female Caucasians, ages: 20-40 weeks; cause of death: spontaneous abortion
Human Fetal Lung - pooled from 38 male/female Caucasians, ages: 20-30 weeks; cause of death: spontaneous abortion
Human Heart - pooled from 3 male Caucasians, ages: 33-55; cause of death: trauma
Human Kidney - pooled from 4 male/female Caucasians, ages: 28-48; cause of death: sudden death
Human Leukocyte - pooled from 550 male/female Caucasians, ages: 18-40; cause of death: blood donors
Human Liver - pooled from 4 male/female Caucasian, ages: 44-50; cause of death: trauma
Human Lung - pooled from 4 male/female Caucasians, ages: 14-35; cause of death: sudden death
Human Lymph Node - pooled from 30 male/female Caucasians, ages: 20-69; cause of death: sudden death
Human Ovary - pooled from 5 female Caucasians, ages: 30-60; cause of death: trauma
Human Pancreas - pooled from 15 male/female Caucasians, ages: 22-69; cause of death: sudden death
Human Placenta - pooled from 4 female Caucasians, ages: 23-35; cause of death: after birth
Human Prostate - pooled from 20 male Caucasians, ages: 20-58; cause of death: trauma
Human Retina - pooled from 99 male/female Caucasians, ages: 15-80; cause of death: sudden death
Human Salivary Gland - pooled from 26 male/female Caucasians, ages: 10-70; cause of death: trauma
Human Skeletal Muscle - pooled from 7 male/female Caucasians, ages: 20-68; cause of death: sudden death
Human Small Intestine - pooled from 11 male/female Caucasians, ages: 15-60; cause of death: trauma
Human Smooth Muscle - pooled from 10 male/female Caucasians, ages: 30-62
Human Spinal Cord - pooled from 12 male/female Caucasians, ages: 18-56; cause of death: sudden death or trauma
Human Spleen - pooled from 3 male/female Caucasians, ages: 49-54; cause of death: sudden death
Human Stomach - pooled from 7 male/female Caucasians, ages: 20-55; cause of death: sudden death
Human Thalamus - pooled from 10 male/female Caucasians, ages: 32-75; cause of death: trauma
Human Testis - pooled from 45 male Caucasians, ages: 14-64; cause of death: sudden death
Human Thymus - pooled from 4 male/female Caucasians, ages: 14-22; cause of death: sudden death
Human Thyroid Gland - pooled from 65 male/female Caucasians, ages: 18-61; cause of death: trauma
Human Uterus - pooled from 11 female Caucasians, ages: 15-55; cause of death: sudden death
