

EpiXplore™ ChIP Assay Kit: Anti-mouse IgG

Catalog No.	Amount
632015	24 assays

Description

Clontech's EpiXplore Chromatin Immunoprecipitation (ChIP) Assay Kit: Anti-mouse IgG enables identification of protein-DNA interactions. Anti-mouse beads have significantly higher affinity for mouse antibodies than protein G, leading to high efficiency pull-down assays when using mouse primary antibodies. Specially formulated buffers have been optimized to reduce nonspecific DNA pull-down and enhance signal; use of DNA purifying resin enables rapid elution of DNA and direct PCR analysis; and the optimized protocol reduces the ChIP assay to less than one day.

Package Contents

- Mag Capture Beads (2 x Cat. No. 632577) (Not sold separately) >> [View Components](#)
- EpiXplore ChIP Assay Reagents (Cat. No. 632011) (Not sold separately) >> [View Components](#)
