

# Certificate of analysis

---

**Product Name/Description:** Cla I  
**Cat. #:** 1034A  
**Lot #:** Specified on product label  
**Storage Conditions:** -20 degrees C  
**Expiration Date:** Specified on product label or package

**Package Size:** 1000 U

**Package Contents:**

1. Cla I	10 U/μl	1000 U
2. 10X M Buffer		1 ml
3. 10X Loading Buffer		1 ml

**Source:** Escherichia coli carrying the plasmid encoding Cla I gene

**Quality Control Data:**

**Overdigestion test:**

Nonspecific nuclease activity was not detected after incubating 1 μg of λDNA with 20 units of this enzyme in 50 μl of the supplied buffer overnight at 30°C, as assessed by agarose gel electrophoresis.

**Ligation-Recutting test:**

After 10-fold overdigestion with this enzyme, the DNA fragments could be ligated with T4 DNA ligase and recut with this enzyme.

Ligation: >95% , Recutting: 100%

**Genomic DNA Digest:**

Arthrobacter luteus chromosomal DNA (0.5 μg) embedded in a 0.5% agarose gel block was digested with 50 units of this enzyme in 100 μl of the supplied buffer overnight at 30°C. The expected profile was confirmed by pulsed-field gel electrophoresis.

**Labeled oligonucleotide assay (LOA) test:**

The degradation rate of oligonucleotides was less than 10% during incubation with 6 U of this enzyme for 1 hour in 10 μl of the supplied buffer.

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department of Takara Bio Inc.
