

Product Name/Description: Fba I (Bcl I)
Cat. #: 1045A
Lot #: Specified on product label
Storage Conditions: -20 degrees C
Expiration Date: Specified on product label or package

Package Size: 500 U

Package Contents:	1. Fba I	12 U/μl	500 U
	2. 10X K Buffer		1 ml
	3. 10X Loading Buffer		1 ml

Product Documents: Documents for Takara Bio products are available for download at www.takara-bio.com

Source: Flavobacterium balustinum

Quality Control Data:

Overdigestion test:

Nonspecific nuclease activity was not detected after incubating 1 μg of N6-methyladenine free λ DNA with 15 units of this enzyme in 50 μl of the supplied buffer overnight at 37°C, as assessed by agarose gel electrophoresis.

Ligation-Recutting test:

After 10-fold overdigestion with this enzyme, the DNA fragments could be ligated with T4 DNA ligase and recut with this enzyme.

Ligation: 100% , Recutting: 100%

pKF3 Enforcement Cloning test:

An Enforcement Cloning Vector, pKF3, was completely digested using 10-fold excess amount of this enzyme, ligated, and subsequently transferred into TH2 Competent Cells. The percentage of transformants that contained damaged rpsL genes caused by contaminants in this enzyme or ligase was less than 2.0%.

It is certified that this product meets above specifications.
