

Certificate of analysis

Product Name/Description: Not I
Cat. #: 1166BH
Lot #: Specified on product label
Storage Conditions: -20 degrees C
Expiration Date: Specified on product label or package

Package Size: 2500 U

Package Contents:	1. Not I	50 U/ μ l	2500 U
	2. 10X H Buffer		1 ml
	3. 0.1% BSA		1 ml
	4. 0.1% Triton X-100		1 ml
	5. 10X Loading Buffer		1 ml

Source: Escherichia coli carrying the plasmid encoding Not I gene

Quality Control Data:

Overdigestion test:

Nonspecific nuclease activity was not detected after incubating 1 μ g of pAS12-Xba I digest with 20 units of this enzyme in 50 μ l of the supplied buffer overnight at 37°C, as assessed by agarose gel electrophoresis.

Ligation-Recutting test:

After 10-fold overdigestion with this enzyme, the DNA fragments could be ligated with T4 DNA ligase and recut with this enzyme.

Ligation: >95% , Recutting: 100%

Genomic DNA Digest:

Escherichia coli chromosomal DNA (0.5 μ g) embedded in a 0.5% agarose gel block was digested with 50 units of this enzyme in 100 μ l of the supplied buffer overnight at 37°C. The expected profile was confirmed by pulsed-field gel electrophoresis.

Labeled oligonucleotide assay (LOA) test:

The degradation rate of oligonucleotides was less than 10% during incubation with 6 U of this enzyme for 1 hour in 10 μ l of the supplied buffer.

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department of Takara Bio Inc.
