

Product Name/Description: 20 bp DNA Ladder
Cat. #: 3409A
Lot #: Specified on product label
Storage Conditions: -20 degrees C
Expiration Date: 2 years from date of receipt under proper storage condition

Package Size: 50 µg

Package Contents:	1. 20 bp DNA Ladder	200 ng/µl	50 µg
	2. 6X Loading Buffer		1 ml

Note: Storage condition of component "6X Loading Buffer": Once thawed, it should be stored at room temperature.

Product Documents: Documents for Takara Bio products are available for download at www.takara-bio.com

Quality Control Data:

By comparing Sample with Control, no significant difference was observed in the intensity and size of the fragments on the electrophoresis gel. This marker consisted of 10 fragments between 20 and 200 bp in multiples of 20 bp and additional fragments at 300, 400 and 500 bp. The 100, 200 and 500 bp fragments were brighter than the other fragments and served as a visible reference indicator; all other fragments appeared with equal intensity on the gel. They were all double-stranded DNA fragments.

It is certified that this product meets above specifications.
