

Certificate of Analysis

Minimal SD Base

Catalog No.
630411

Amount
267 g

Lot Number
Specified on product label.

Description

Minimal synthetic defined (SD) base includes a yeast nitrogen base, ammonium sulfate, and glucose as a carbon source. For preparation of synthetic minimal medium for yeast culture, the Minimal SD Base should be used at 26.7 g/L. Amino acids are not added so dropout (DO) supplements must be purchased and added separately to the Minimal SD Base to make a synthetic, defined medium lacking the specified nutrients allowing for selection of transformed yeast clones. Please see our Yeast Media Protocol-At-A-Glance for details.

Package Contents

- 267 g Minimal SD Base

Storage Conditions

- Store at room temperature

Expiration Date

- Specified on product label

Shipping Conditions

- Room temperature

Product Documents

Documents for our products are available for download at takarabio.com/manuals
The following documents apply to this product:

- Yeast Media Protocol-At-A-Glance

Quality Control Data

The following inspections were completed and confirmed:

Powder appearance - free-flowing, very fine/granular

Powder color - light yellow/tan

The powder was dissolved at a concentration of 26.7g/L and autoclaved, the appearance, color and pH were as expected.

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department.
