

## pTRE3G-IRES Vector Set

**Catalog No.**

631174 (Not sold separately)  
Sold as a part of 631166, 631170 & 631346

**Amount**

Each

**Lot Number**

Specified on product label.

### Description

The pTRE3G-IRES Vector Set provides an inducible, bicistronic, mammalian expression vector that is tightly regulated, and highly responsive to Tet-On<sup>®</sup>, Tet-Off<sup>®</sup>, and Tet-Express<sup>™</sup> transactivators (1). The simultaneous expression of two genes of interest is driven from the inducible  $P_{\text{TRE3G}}$  promoter, which produces 5–20-fold less background expression than the  $P_{\text{Tight}}$  promoter. The vector set also includes: a control vector that expresses luciferase in response to transactivation; and two linear selection markers for hygromycin and puromycin resistance.

### Package Contents

- 20  $\mu\text{l}$  pTRE3G-IRES Vector (500 ng/ $\mu\text{l}$ )
- 20  $\mu\text{l}$  pTRE3G-Luc Control Vector (500 ng/ $\mu\text{l}$ )
- 40  $\mu\text{l}$  Linear Hygromycin Marker (50 ng/ $\mu\text{l}$ )
- 40  $\mu\text{l}$  Linear Puromycin Marker (50 ng/ $\mu\text{l}$ )

### Storage Conditions

- Store plasmids at  $-20^{\circ}\text{C}$ .
- Spin briefly to recover contents.
- Avoid repeated freeze/thaw cycles.

### Shelf Life

- 1 year from date of receipt under proper storage conditions.

### Storage Buffer

- 10 mM Tris-HCl (pH 8.0), 1 mM EDTA (pH 8.0)

### Concentration

- pTRE3G-IRES Vector and pTRE3G-Luc Control Vector: 500 ng/ $\mu\text{l}$
- Linear Markers: 50 ng/ $\mu\text{l}$

### Shipping Conditions

- Dry ice ( $-70^{\circ}\text{C}$ )

## Product Documents

Documents for our products are available for download at [takarabio.com/manuals](http://takarabio.com/manuals)

The following documents apply to this product:

- Tet-Express Inducible Expression Systems User Manual (PT5167-1)
- Tet-On 3G Expression Systems User Manual (PT5148-1)
- pTRE3G-IRES Vector Information
- pTRE3G-Luc Control Vector Information

## Propagation in *E. coli*

- Suitable host strain: Stellar™ Competent Cells
- Selectable marker: plasmid confers resistance to ampicillin (100 µg/ml) in *E. coli* hosts.
- *E. coli* replication origin: pUC

## Quality Control Data

### Plasmid Identity & Purity

- Digestion with the indicated restriction enzymes produced fragments of the indicated sizes on a 0.8% agarose/EtBr gel:

| Vector      | Enzymes       | Fragments    |
|-------------|---------------|--------------|
| pTRE3G-IRES | BamHI         | 4.0 kb       |
|             | EcoRI & BamHI | 1.0 & 3.0 kb |
| pTRE3G-Luc  | XhoI          | 5.1 kb       |
|             | EcoRI & BamHI | 2.1 & 3.0 kb |

- Vector identity was confirmed by sequencing.
- A<sub>260</sub>/A<sub>280</sub>: 1.8–2.0

### Linear Selection Marker Identity

- Digestion with the indicated restriction enzymes produced fragments of the indicated sizes on a 0.8% agarose/EtBr gel:

| Marker                   | Enzyme(s)      | Size(s)              |
|--------------------------|----------------|----------------------|
| Linear Hygromycin Marker | HindIII & XbaI | 0.5, 0.6 & 1.1 kb    |
| Linear Puromycin Marker  | HindIII & XbaI | 0.45, 0.6, & 0.75 kb |

### Functional Testing of Linear Markers

- HEK 293 cells were transfected with 200 ng of either the Linear Hygromycin Marker or the Linear Puromycin Marker. After 5 hr at 37°C, the transfection solution was removed and the cells were given fresh medium. 48 hr later, the cells were plated in two 10-cm plates. 48 hr after plating, medium containing either hygromycin or puromycin was added to the plates. After 2–3 weeks, >20 clones were identified.

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department.

### NOTICE TO PURCHASER:

Our products are to be used for research purposes only. They may not be used for any other purpose, including, but not limited to, use in drugs, in vitro diagnostic purposes, therapeutics, or in humans. Our products may not be transferred to third parties, resold, modified for resale, or used to manufacture commercial products or to provide a service to third parties without prior written approval of Takara Bio USA, Inc.

Your use of this product is also subject to compliance with the licensing requirements listed below and described on the product's web page at <http://www.takarabio.com>. It is your responsibility to review, understand and adhere to any restrictions imposed by these statements.

### STATEMENT 42

Use of the Tetracycline controllable expression systems (the "Tet Technology") is covered by a series of patents including U.S. Patent # 7541446, # 8383364, # 9181556, European patents EP # 1200607, # 1954811, #2352833 and corresponding patent claims outside these regions which are proprietary to TET Systems GmbH & Co. KG. Academic research institutions are granted an automatic license with the purchase of this product to use the Tet Technology only for internal, academic research purposes, which license specifically excludes the right to sell, or otherwise transfer, the Tet Technology or its component parts to third parties. Notwithstanding the above, academic and not-for profit research institutions whose research using the Tet Technology is sponsored by for profit organizations, which shall receive ownership to any data and results stemming from the sponsored research, shall need a commercial license agreement from TET Systems in order to use the Tet Technology. In accepting this license, all users acknowledge that the Tet Technology is experimental in nature. TET Systems GmbH & Co. KG makes no warranties, express or implied or of any kind, and hereby disclaims any warranties, representations, or guarantees of any kind as to the Tet Technology, patents, or products. All others are invited to request a license from TET Systems GmbH & Co. KG prior to purchasing these reagents or using them for any purpose. Takara Bio USA, Inc. is required by its licensing agreement to submit a report of all purchasers of the Tet-controllable expression system to TET Systems.
