

Guide-it™ Mutation Detection Kit

Catalog Nos.	Amount	Lot Number
631443	100 rxns	Specified on product label.
631448	25 rxns	Specified on product label.

Description

The Guide-it Mutation Detection Kit contains all the reagents needed for PCR-based identification of insertions or deletions generated during cellular non-homologous end joining (NHEJ) repair. The first step is the amplification of the putative target sequence directly from cells. This kit uses Terra™ Direct PCR Polymerase Mix and buffer, so there is no need to extract genomic DNA from your cell population prior to amplification of your target sequence. The amplicon is then melted and hybridized to form the mismatched targets for cleavage by the Guide-it Resolvase. Sufficient material is provided for 100 amplification and cleavage reactions.

Package Contents

<u>631443</u> (100 rxns)	<u>631448</u> (25 rxns)	
4 x 5 ml	1 x 5 ml	Extraction Buffer 1
1 x 2 ml	1 x 500 µl	Extraction Buffer 2
1 x 100 µl	1 x 25 µl	Guide-it Resolvase
1 x 100 µl	1 x 25 µl	Terra Direct PCR Polymerase Mix (1.25 U/µl)
3 x 1 ml	1 x 750 µl	2X Terra Direct PCR Buffer (with Mg ²⁺ , dNTP)
5 x 1 ml	1 x 1 ml	PCR-Grade Water
1 x 75 µl	1 x 75 µl	Positive Control DNA for Resolvase

Storage Conditions

- Store at –20°C.

Expiration Date

- Specified on product label.

Shipping Conditions

- Dry ice

Certificate of Analysis

Cat. Nos. 631443 & 631448

Guide-it Mutation Detection Kit

Quality Control Data

Terra Direct PCR Polymerase Mix

Terra Direct PCR Polymerase Mix was used to amplify 0.5 kb and 2 kb targets from human genomic DNA. The enzyme produced high yields of each target, with little or no background. No endonuclease or exonuclease activity was detected.

Guide-it Resolvase

No exonuclease or endonuclease activity was detected.

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department.
