

BacPAK™ Baculovirus GoStix™ Plus

Catalog No.

631479

Amount

20 tests

Lot Number

Specified on product label.

Description

BacPAK Baculovirus GoStix Plus is designed to rapidly quantify baculovirus titer using only 20 µl of cell supernatant. The test detects and quantifies baculoviral gp64 via the GoStix Plus smartphone app, which compares the intensity of the bands to an internal gp64 standard control. The resulting value (i.e., a GoStix Value [GV] equivalent to ng/ml gp64) can be used to compare virus amounts between different preparations in just 10 min. The included gp64 Control confirms GoStix function. Visit takarabio.com/gostixhelp for more information about GoStix assays and additional guidance on downloading and using the smartphone app.

Package Contents

- 20 each BacPAK Baculovirus GoStix Plus (1 test each)
- 2 x 3 ml gp64 Chase Buffer
- 1 vial gp64 Control (5 tests/vial)

Storage Conditions

- Store at room temperature.
- The gp64 Control should be used immediately after reconstitution.

Expiration Date

- Specified on product label.

Shipping Conditions

- Room temperature

Product Documents

Documents for our products are available for download at takarabio.com/manuals

The following documents apply to this product:

Quality Control Data

BacPAK Baculovirus GoStix Plus were tested in triplicate with a dilution series of recombinant gp64 control protein, and samples were read using the GoStix Plus app on both iOS and Android platforms to establish the assay's linearity, which was >0.97.

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department.
