His60 Ni Magnetic Beads

Catalog Nos.	Amount	Lot Number

635692 10 ml Specified on product label. 635693 1 ml Specified on product label.

Description

His60 Ni Magnetic Beads provide the selective chemistry of His60 Ni immobilized metal affinity chromatography (IMAC) resin in a magnetic bead format. The beads are designed for the microscale purification of high and low molecular weight recombinant his-tagged proteins under native or denaturing conditions, when placed on a magnetic separator.

Package Contents

<u>635692</u> <u>635693</u>

10 ml 1 ml His60 Ni Magnetic Beads

Storage Conditions

• Store at 4°C.

Expiration Date

• Specified on product label.

Storage Buffer

Nonbuffered 20% ethanol.

Shipping Conditions

• Room temperature

Product Documents

Documents for our products are available for download at <u>takarabio.com/manuals</u> The following documents apply to this product:

- His60 Ni Magnetic Beads Protocol-At-A-Glance
- xTractorTM Buffer & xTractor Buffer Kit User Manual

Quality Control Data

Metal loading analysis

Each lot of His60 Ni Magnetic Beads is guaranteed to have a divalent metal loading capacity of >20 μmol/g of beads. The amount of bound metal is determined by atomic spectroscopy.

Functional test

His60 Ni Magnetic Beads were functionally tested using his-tagged AcGFP1. A 200 µl aliquot of a 5% suspension of His60 Ni Magnetic Beads was saturated with a bacterial his-tagged AcGFP1 lysate in xTractor Buffer (pH 7.2). The beads were washed three times with 0.5 ml of equilibration buffer. Bound protein was eluted with elution buffer. A sample of eluant was analyzed by electrophoresis to verify the purity of the eluted protein.

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department.
