

Capturem™ Protein A 24-Well Plate

Catalog No.
635731

Amount
1 x 24-well plate

Lot Number
Specified on product label.

Description

The Capturem Protein A 24-Well Plate is a single-use disposable plate for the simple, rapid purification of antibodies that can be loaded with up to 4.5 ml of sample per well. This plate is suitable for purification of antibodies from animal serum, ascites fluid, cell culture supernatant of hybridoma cell lines and other sources.

Package Contents

- 1 Capturem Protein A 24-Well Plate

Storage Conditions

- Store plate at room temperature.

Shelf Life

- 1 year from date of receipt under proper storage conditions.

Shipping Conditions

- Room temperature

- Capturem Protein A 24-Well Plate Protocol-At-A-Glance

Quality Control Data

The Capturem Protein A 24-Well Plate was tested using horse serum and the buffers described in the Capturem Protein A 24-Well Plate Protocol-At-A-Glance (Protocol B: Antibody Purification Using Centrifugation). The plate was equilibrated with 2 ml of Equilibration/Binding/Wash Buffer per well at 600g for 2 min at room temperature. Wells were loaded with 4 ml of serum diluted 1:15 with Equilibration/Binding/Wash Buffer, followed by washing with 2 ml of Wash Buffer per well at 600g for 2 min at room temperature. Bound antibody was then eluted with 750 µl of Elution Buffer into a collection plate containing 75 µl of Neutralization Buffer. The eluate was analyzed by electrophoresis on a 4–20% SDS polyacrylamide gel to verify the purity of the eluted antibodies. The expected ~25 kDa band (corresponding to light chain IgG) and ~50 kDa band (corresponding to heavy chain IgG) were observed.

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department.
