

Capturem™ Streptavidin Miniprep Columns

Catalog No.
635733

Amount
20 columns

Lot Number
Specified on product label.

Description

Capturem Streptavidin Miniprep is a single-use disposable column for simple, rapid enrichment of target proteins and antibodies that bind biotinylated proteins. The membranes are guaranteed to bind more than 15 µg of biotinylated BSA control per column. These miniprep columns are suitable for enrichment of target proteins and antibodies, including those from animal serum, cell culture lysates (e.g., mammalian or bacterial cell lysates), and cell culture supernatants of hybridoma cell lines.

Package Contents

- 20 Capturem Streptavidin Miniprep Columns

Storage Conditions

- Store columns at room temperature.

Shelf Life

- 1 year from date of receipt under proper storage conditions.

Shipping Conditions

- Room temperature

Quality Control Data

The Capturem Streptavidin Miniprep Columns were tested using biotinylated albumin (from bovine serum; BSA) and the buffers described in the Capturem Streptavidin Miniprep User Manual. ~100 µg of biotinylated BSA was added to Equilibration/Binding/Wash Buffer, and the concentration of biotinylated BSA was recorded by measuring the absorbance at 280 nm with a NanoDrop spectrophotometer. The column was then equilibrated with 800 µl of Equilibration/Binding/Wash Buffer, centrifuged at 500g for 1 min, and loaded with 200 µl of prediluted biotinylated BSA. After centrifugation at 500g for 1 min, the concentration of biotinylated BSA in the flowthrough was recorded by measuring the absorbance at 280 nm with a NanoDrop spectrophotometer. The Capturem Streptavidin Miniprep bound more than 15 µg of the biotinylated BSA.

It is certified that this product meets the specifications above, as reviewed and approved by the Quality Department.
