

## High Yield PCR EcoDry™ Premix

**Catalog No.**  
639278

**Amount**  
24 rxns

**Lot Number**  
Specified on product label.

### Description

High Yield PCR EcoDry Premix is a convenient dry master mix that allows efficient amplification of DNA templates. When reconstituted, each tube of High Yield PCR EcoDry Premix contains all of the necessary reagents for high yield PCR, including Titanium® *Taq* DNA Polymerase Mix, dNTPs, and optimized buffer. Titanium *Taq* combines a 5'-exonuclease-deficient *Taq* DNA Polymerase with TaqStart® Antibody to allow automatic hot-start PCR. Simply reconstitute the mix by adding PCR-grade water along with your primers and template. EcoDry Premixes are packaged as individual 8-well tube strips with optically clear sealing caps.

### Package Contents

- 3 x 8-tube strips High Yield PCR EcoDry Premix
- 3 Optically Clear PCR Cap Strips (8 caps/strip)

### Storage Conditions

- Store at room temperature.
- Keep free from moisture. Store opened, unused product in a desiccator at room temperature.

### Expiration Date

- Specified on product label.

### Shipping Conditions

- Room temperature

### Product Documents

Documents for our products are available for download at [takarabio.com/manuals](http://takarabio.com/manuals)  
The following documents apply to this product:

- High Yield PCR EcoDry Premix Protocol-At-A-Glance

### Quality Control Data

#### Raw Material Quality Control

Purified N-terminal deletion mutant of *Taq* DNA Polymerase was tested for enzymatic activity and PCR performance. Assays were performed to detect endonuclease, exonuclease, and DNA contamination.

#### Functional Quality Control

#### Amplification from a genomic DNA template:

7 tubes in a sample strip from this lot of High Yield PCR EcoDry Premix were tested using 50 ng calf thymus

# Certificate of Analysis

Cat. No. 639278

High Yield PCR EcoDry Premix

---

genomic DNA per tube as template, and primers specific for the BPTI gene (400 nM). The 8th tube served as a no-template control. Cycling conditions were as follows:

95°C	1 min	
30 cycles:		
95°C	15 sec	]
68°C	30 sec	
68°C	3 min	

An aliquot of PCR product from each tube was electrophoresed on a 1.2% TAE/agarose gel to confirm the presence of a 407 bp band with minimal background. Results of the no-template control showed no visible bands.

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department.
