

High Fidelity PCR EcoDry™ Premix

| Catalog No. | Amount | Lot Number |
|--------------------|---------------|-----------------------------|
| 639282 | 24 rxns | Specified on product label. |

Description

High Fidelity PCR EcoDry Premix is a convenient dry master mix that allows efficient and accurate amplification of DNA. When reconstituted, each tube of High Fidelity PCR EcoDry Premix contains all of the necessary reagents for high fidelity PCR, including Advantage® 2 Polymerase Mix, dNTPs, and optimized buffer. Advantage 2 combines a 5'-exonuclease-deficient *Taq* DNA Polymerase, a hot-start antibody, and a small amount of a proofreading polymerase for improved fidelity. Simply reconstitute the mix by adding PCR-grade water along with your primers and template. EcoDry Premixes are packaged as individual 8-well tube strips with optically clear sealing caps.

Package Contents

- 3 x 8-tube strips High Fidelity PCR EcoDry Premix
- 3 Optically Clear PCR Cap Strips (8 caps/strip)

Storage Conditions

- Store at room temperature.
- Keep free from moisture. Store opened, unused product in a desiccator at room temperature.

Expiration Date

- Specified on product label.

Shipping Conditions

- Room temperature

Quality Control Data

Raw Material Quality Control

Purified N-terminal deletion mutant of *Taq* DNA Polymerase was tested for enzymatic activity and PCR performance. Assays were performed to detect endonuclease, exonuclease, and DNA contamination.

Functional Quality Control

Amplification from a genomic DNA template:

7 tubes in a sample strip from this lot of High Fidelity PCR EcoDry Premix were tested using 50 ng calf thymus genomic DNA per tube as template, and primers specific for the BPTI gene (400 nM). The 8th tube served as a no-template control. Cycling conditions were as follows:

| | | |
|------------|--------|---|
| 95°C | 1 min | |
| 30 cycles: | | |
| 95°C | 30 sec |] |
| 68°C | 3 min | |
| 68°C | 3 min | |

5 µl of the PCR product from each tube was electrophoresed on a 0.8% TAE/agarose gel to confirm the presence of a 2.5 kb band with minimal background. Results of the no-template control showed no visible bands.

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department.
