

CloneAmp™ HiFi PCR Premix

Catalog No. 639298	Amount 200 rxns	Lot Number Specified on product label.
------------------------------	---------------------------	--

Description

CloneAmp HiFi PCR Premix is a convenient 2X master mix that provides exceptionally accurate and efficient DNA amplification, due to the high sensitivity, specificity, priming efficiency, and extension efficiency of CloneAmp HiFi Polymerase. In addition, this enzyme is formulated with a hot start antibody to prevent nonspecific amplification. The CloneAmp HiFi PCR Premix contains all of the necessary reagents for high fidelity PCR, including CloneAmp HiFi Polymerase, dNTPs, and optimized buffer. It allows rapid set-up of PCR reactions and is useful for high-throughput applications.

Package Contents

- 4 tubes 2X CloneAmp HiFi PCR Premix (625 µl/tube)

Storage Conditions

- Store at -20°C.

Expiration Date

- Specified on product label.

Shipping Conditions

- Dry ice

Product Documents

Documents for our products are available for download at takarabio.com/manuals

The following documents apply to this product:

- CloneAmp HiFi PCR Premix Protocol-At-A-Glance

Quality Control Data

CloneAmp HiFi PCR Premix was tested for enzymatic activity and PCR performance.

Raw Material Quality Control

A purity test performed with supercoiled pBR322 or λ DNA did not detect any nicking or endonuclease activities.

PCR Performance

- Amplification sensitivity was tested by amplifying a 4 kb fragment from a plasmid DNA template.
- Amplification performance was tested by amplifying 0.5, 1, 2, 3, and 4 kb fragments from a human genomic DNA template.

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department.
