

TB Green® Advantage® qPCR Premix

Catalog No.
639676

Amount
200 rxns

Lot Number
Specified on product label.

Description

TB Green Advantage qPCR Premix is a convenient 2X master mix containing TB Green dye, full-length Taq DNA Polymerase, hot-start antibody, dNTPs, and buffer (including Mg²⁺). The mix comes with two separate tubes of ROX passive reference dye: ROX Reference Dye LSR contains the optimal concentration of ROX for instruments whose excitation source is a 488 nm laser; and ROX Reference Dye LMP contains the optimal concentration of ROX for instruments whose excitation source is either a lamp or an LED.

Package Contents

- 4 tubes 2X TB Green Advantage qPCR Premix (625 µl/tube)
- 100 µl ROX Reference Dye LSR (50X)
- 100 µl ROX Reference Dye LMP (50X)

Storage Conditions

- Store at -70°C in the dark.
- After thawing, store at 4°C in the dark for up to 6 months.
- Do not refreeze.

Shelf Life

- See product label.

Shipping Conditions

- Dry ice (-70°C)

Product Documents

Documents for our products are available for download at takarabio.com/manuals

The following documents apply to this product:

- TB Green Advantage qPCR Premix User Manual
- TB Green Advantage qPCR Premix Protocol-at-a-Glance

Quality Control Data

qPCR Performance

These reagents were tested by amplification with primers and corresponding template for lambda DNA, resulting in amplification of a 300-bp amplicon. Expected results were obtained on amplification plots and melting curves for this assay in the presence of ROX passive reference dye using the appropriate cycling conditions.

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department.
