SmartChip® Real-Time RT-PCR SARS-CoV-2 Reagents

Catalog No. 640256
Amount 1 Kit
Lot Number 2110105

Description
This assay is for Research Use Only. Not for use in diagnostic procedures.

The SmartChip Real-Time RT-PCR SARS-CoV-2 Assay is a real-time PCR assay intended for the qualitative detection of RNA from the SARS-CoV-2 virus in nasopharyngeal swabs.

The SmartChip Real-Time RT-PCR SARS-CoV-2 Reagents accommodate one chip run on the SmartChip Real-Time PCR System (Cat. No. 640022) with 378 samples and 6 controls (negative control in triplicate, positive control in duplicate, and an extraction control) in four hours of total processing time.

Package Contents

Box 1:
- 922 µl SmartChip Probe qPCR Master Mix
- 58 µl SMARTScribe™ Reverse Transcriptase
- 1 ml Negative Control
- 20 µl Positive Control RNA Mix
- 1 ml EASY Dilution (for Real Time PCR)

Box 2:
- 2 each 384-Well Source Plate
- 2 each 384-Well Source Plate Seal
- 1 each SmartChip MyDesign Chip, 250nl
- 2 each Blotting Paper
- 1 each Intermediate Film
- 1 each Cycler Sealing and Pressure Film

Storage Conditions
- Box 1: Store at –80°C.
- Box 2: Store at room temperature.

Expiration Date
- Specified on product label.

Shipping Conditions
- Box 1: Dry ice
- Box 2: Room temperature
Certificate of Analysis
SmartChip® Real-Time RT-PCR SARS-CoV-2 Reagents

Quality Control Data

The kit components have been functionally tested by dispensing positive and negative control materials into the 384-Well Source Plate using the MultiSample NanoDispenser (MSND), followed by dispensing assays (primer/probe mixes) combined with RT-qPCR amplification reagents; the chip was sealed with the Cycler Sealing and Pressure film, and then subject to thermocycling and detection on the SmartChip Real-Time PCR System. No amplification (Ct <33.5) should be observed in the N1, N2, and RP wells containing the Negative Control (provided in the kit). In the wells containing the Positive Control RNA Mix, amplification should be observed in at least 4/5 replicate wells for each of the N1 and N2 assays, and amplification observed in both replicate wells (2/2) for the RP assay.

Expected performance of controls included in the 2019-nCoV diagnostic panel:

<table>
<thead>
<tr>
<th>Control Type</th>
<th>External Control Name</th>
<th>Used to Monitor</th>
<th>2019 nCoV_N1</th>
<th>2019 nCoV_N2</th>
<th>RP</th>
