Certificate of Analysis

Product Name/Description: Anti-N-cadherin, Polyclonal

Cat. #: M142

Lot #: Specified on product label

Storage Conditions: 4 degrees C

Expiration Date: 2 years from date of receipt under proper storage condition

Package Size: 0.4 mg

Package Contents: 1. Anti-N-cadherin, Polyclonal 0.4 mg

Product Documents: Documents for Takara Bio products are available for download at www.takara-bio.com

Antibody

Rabbit polyclonal antibody raised against the peptide (808 - 827) of human N-cadherin conjugated

with KLH.

Bovine Serum Albumin (BSA):

The BSA was derived from bovine serum or plasma from US sourced cattle slaughtered at a USDA license establishment located in the US. The animal used was under 30 months of age that were not stunned using a penetrating device that injects air into the cranial cavity. All cattle received ante- and post mortem health inspections under a veterinarian's supervision at the abattoir and were apparently free from infections and contagious diseases and injurious parasites. At the time of manufacture of this lot of material, the US is classified as a country that is free from

rinderpest, foot-and-mouth disease and contiguous bovine pleuropneumonia.

Quality Control Data:

The lyophilized antibody was dissolved in $200~\mu l$ of dH2O. The antibody dilutions were applied for ELISA assay by colorimetric detection using a microtiter plate immobilized with recombinant human N-cadherin. The expected antibody titration was obtained.

Manufacturing Control:

Purification:

Rabbit serum lgG purified by affinity column chromatography, dissolved in 10 mM PBS, pH7.4, containing 1.0% bovine serum albumin, and then lyophilized.

The lyophilized antibody does not contain preservative.

BSA treatment:

The BSA product has been subjected to an initial heat shock of bovine serum or plasma at 65

degrees C for 3 hours at pH around 5.

It is certified that this product meets above specifications.
