

DNA HT Dual Index Kit - 96N Set B

| | | |
|-------------------------------|--------------------------|--|
| Catalog No. R400661 | Amount 96 rxns | Lot Number Specified on product label. |
|-------------------------------|--------------------------|--|

Description

DNA HT dual index kits contain dual-indexed PCR primers for amplification of indexed Illumina®-compatible NGS libraries.

Package Contents

- 1 Dual Index Plate (96N Set B); 5 µl/well (5 µM)

Storage Conditions

- Store at -20°C.

Expiration Date

- Specified on product label.

Shipping Conditions

- Dry ice (-70°C)

Product Documents

Documents for our products are available for download at takarabio.com/manuals
The following documents apply to this product:

- DNA HT Dual Index Kit Protocol-At-A-Glance

Quality Control Data

All purified primers were verified by ESI analysis.

All primers were functionally tested with 200 pg of 200-bp sheared human genomic DNA using the ThruPLEX® DNA-Seq Kit to produce indexed libraries. The libraries were pooled, purified, quantified, and then sequenced on the Illumina sequencing platform. The following parameters were measured for libraries prepared with indexed primers, which were required to meet the following specifications:

| Test Parameters | Result (%) |
|-----------------------------------|------------|
| qPCR end-point fluorescence (%CV) | ≤20 |
| % Coverage (%CV) | ≤20 |
| Read pairs examined (%CV) | ≤20 |
| Barcode balance as min/mean (%) | ≥40 |

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department.

DNA HT Dual Index Kit - 96N Set B
