

ThruPLEX® HV UDI Set A

Catalog No.

R400738

Amount

96 rxns

Lot Number

Specified on product label.

Description

ThruPLEX HV UDI kits contain unique dual-indexed PCR primers for amplification of indexed Illumina®-compatible NGS libraries. These primers can be used in ThruPLEX HV kits.

Package Contents

- 12 µl ea. ThruPLEX HV UDI 001–096 (6.25 µM/oligo, 12.5 µM total/oligo pair, 96-well plate format)

Storage Conditions

- Store at –20°C.

Expiration Date

- Specified on product label.

Shipping Conditions

- Dry ice

Product Documents

Documents for our products are available for download at takarabio.com/manuals

The following documents apply to this product:

- ThruPLEX HV UDI Protocol-At-A-Glance
- ThruPLEX HV UDI Index Map

Quality Control Data

All primers were verified by ESI analysis to have a major peak with a measured molecular weight within 10 Da of the predicted molecular weight.

All primers were functionally tested with first-strand cDNA generated with reagents obtained from the SMARTer® Stranded Total RNA-Seq Kit v2 - Pico Input Mammalian. The libraries were purified, quantified, and verified to generate a uniform yield across all the primers (CV ≤20%) with no primers generating a library yield 40% above or below the average yield of all libraries. Following quality assessment by quantification, libraries were pooled and then sequenced on an Illumina sequencing platform, generating uniform representation of all the barcodes (CV ≤25%).

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department.
