

5X One Step PrimeScript™ III RT-qPCR Kit, no ROX, GPR

Catalog No.

XU0002

Also sold as a part of 638337

Amount

200 rxns

Lot Number

Specified on product label.

Description

The 5X One Step PrimeScript III RT-qPCR Kit, no ROX, GPR is a dedicated general-purpose reagent for one-step real-time, probe-based RT-qPCR (using the 5' nuclease method). This 5X premix does not freeze at its storage temperature of -20°C , so a reaction can be started simply by adding the template, primers, and probes to detect the desired target.

5X One Step PrimeScript III RT-qPCR Mix is a highly concentrated mixture, allowing for flexible sample preparation, such as working with lower concentration primer sets and larger sample volumes to improve detection limits. This product can be used for various applications such as gene expression, RNA virus detection, and more.

Package Contents

- 1 x 1 ml 5X One Step PrimeScript III RT-qPCR Mix, no ROX, GPR
- 2 x 1.5 ml RNase Free H₂O

Storage Conditions

- Store at -20°C

Expiration Date

- Specified on product label.

Shipping Conditions

- Dry ice

Quality Control Data

PCR test:

1. PCR was performed using the One Step PrimeScript III RT-qPCR kit targeting 16S rDNA, but no specific amplification was observed via gel electrophoresis.
2. Consistent and quantitative detection of the human *GAPDH* gene expression was confirmed with the One Step PrimeScript III RT-qPCR kit using a serial dilution of total RNA as a template. No expression was detected in no-template controls.

It is certified that this product meets the above specifications, as reviewed and approved by the Quality Department.
