

Product Components List

HEK 293 Tet-Off® Advanced Cell Line

Catalog No. 631152 **Amount** Each.

Description

HEK 293 Tet-Off Advanced is a transformed human embryonic kidney-derived cell line that expresses the tetracycline (Tet)-regulated transactivator Tet-Off Advanced. Inducible expression of any gene can be achieved by transfecting or transducing this cell line with a vector containing your gene of interest under the control of a tetracycline-responsive promoter. Expression is induced by the withdrawal of doxycycline (Dox) from the culture medium. Tet-inducible cell lines are shipped with Tet System Approved FBS and a control cell line created for inducible expression of luciferase.

Package Contents

- HEK 293 Tet-Off Advanced Cell Line (Cat. No. 632107; not sold separately) >> [View Components](#)
- CHO AA8-Luc Tet-Off Control Cell Line (Cat. No. 631122; not sold separately) >> [View Components](#)
- Tet System Approved FBS, US-Sourced (Cat. No. 631105) >> Please search our website for your specific lot of FBS at takarabio.com/manuals.

For storage conditions, please see the Certificate of Analysis supplied with each component.
