

Product Components List

5X One Step PrimeScript™ III RT-qPCR Kit, no ROX, GPR

Catalog No.	Amount
638337	1,000 rxns

Description

The 5X One Step PrimeScript III RT-qPCR Kit, no ROX, GPR is a dedicated general-purpose reagent for one-step real-time, probe-based RT-qPCR (using the 5' nuclease method). This 5X premix does not freeze at its storage temperature of –20°C, so a reaction can be started simply by adding the template, primers, and probes to detect the desired target.

The 5X One Step PrimeScript III RT-qPCR Mix is a highly concentrated mixture, allowing for flexible sample preparation, such as working with lower concentration primer sets and larger sample volumes to improve detection limits. This product can be used for various applications such as gene expression, RNA virus detection, etc.

Package Contents

- 5 x 5X One Step PrimeScript III RT-qPCR Kit, no ROX, GPR (Cat. No. XU0002) >> [View Components](#)

For storage conditions, please see the Certificate of Analysis supplied with each component.
