Apollo™ Instrument

Catalog No.

640159 (not sold separately)
Sold as a part of 640078.

Amount

Each

Lot Number

Specified on product label.

Description

The Apollo Instrument is part of the Apollo Library Prep System, an automation platform that can run flexible batch sizes without wasting reagents or time. In addition to both DNA and RNA NGS library prep protocols, this versatile system efficiently performs related protocols for sample preparation and cleanup, such as poly A+ RNA enrichment, rRNA depletion, and PCR cleanup. The Apollo system frees you from manual steps by automating the critical portions of the workflow, reducing your hands-on time to just 30 minutes, depending on the sample throughput and script used.

Package Contents

- 1 x Apollo Instrument

Storage Conditions

- Store at room temperature

Shipping Conditions

- Room temperature
